When the following two conditions are met, the suppliers of parts or chemicals shall complete the registration of chemical substances that are intentionally released according to the REACH Regulation of EU, and provide the material registration number to Great Wall Motor.

a) 在车辆正常使用情况下，存在“有意释放”某些化学物质的情况。如：玻璃清洗液、大灯清洗液、灭火器的灭火剂、空气清新剂、轮胎补胎液等。

a) Under the condition of normal use of the vehicle, some chemical substances are "intentionally released. Such as: glass cleaning liquid, headlamp cleaning liquid, extinguishing agent of fire extinguisher, air freshener, tire repair fluid, etc.

b) “有意释放”物质一年内释放总量超过1吨/年/物质。

b) "Intentional release" substances release more than 1 ton / year / substance in a year.

### 6.2 REACH 管制物质的信息提报要求（仅适用于在欧盟市场销售的车型） Information reporting requirements of REACH controlled substances (only applicable to vehicle models sold in EU market)

REACH法规规定的高度关注物质SVHC（包括铅、镉、十溴联苯醚、邻苯二甲酸酯、六溴环十二烷等），物质清单可通过网址：<https://echa.europa.eu/candidate-list-table>查看。

The substance list of SVHC (including lead, cadmium, decabromodifен, terephthalate, hexabromoxane, etc.), which is highly concerned by REACH laws and regulations, can be found through the website: <https://echa.europa.eu/candidate-list-table>.

整车所有零部件及功能性辅料应尽量避免使用SVHC。如不可避免，则每个零部件或辅料中每种SVHC的含量应尽量不超过0.1%，若SVHC含量超过0.1%，且不能进行材料替换的，则供应商必须提供该物质的SDS，或以其他约定的形式提供该物质的以下特性信息：物质名称、物质在均质材料中的含量及均质材料的质量、使用该物质可能出现的危害及危害发生后的急救处置方法、车辆报废时的物质处理方式等。

SVHC should be avoided as far as possible in all parts and functional accessories of the vehicle. If it is inevitable, the content of each SVHC in each component or auxiliary material should not exceed 0.1% as far as possible. If the content of SVHC exceeds 0.1% and the material cannot be replaced, then the supplier must provide the SDS of the substance, or provide the following characteristic information of the substance in other agreed forms: the name of the substance, the content of the substance in the homogeneous material and the mass of the homogeneous material, the possible harm of using the substance and the first aid disposal method after the harm occurs, the material disposal method when the vehicle is scrapped, etc.

### 6.3 禁/限用物质申报的通用要求（适用于所有车型、本标准中所有的禁/限用物质） General requirements for declaration of prohibited/restricted substances (applicable to all vehicle models and all prohibited/restricted substances in this standard)

6.3.1 供应商供应的零部件及功能性辅材料如含有本标准规定的任何一种禁/限用物质，均需通过 CAMDS 或其它约定的方式如实在线申报。CAMDS 数据或以其他方式申报的零部件材料数据将作为判定产品的禁/限用物质含量是否符合产品设计要求的证明文件之一。

If the components and functional auxiliary materials supplied by the supplier contain any kind of prohibited/restricted substances stipulated in this standard, they shall be truthfully declared online through CAMDS or other agreed methods. CAMDS data or parts Material Data declared in other ways will be used as one of the certification documents to determine whether the content of prohibited/restricted substances of products meets the requirements of product design.

6.3.2 CAMDS 数据或以其他方式申报的零部件材料数据中，禁/限用物质申报的信息除需满足系统本身的规则外，还需满足以下要求：

CAMDS data or parts material data declared in other ways, in addition to meeting the rules of the system itself, the declaration information of prohibited/restricted substances also needs to meet the following requirements:

- a) 申报的物质须是最终成品状态下的零部件所含的物质，如申报零部件镀层的物质，需申报最终镀层中物质的信息，不能申报形成镀层前的镀液中的物质信息。

The declared substances must be the substance contained in the parts under the state of the final product. For example, if the substance of the coating on the parts is reported, the information of the substance in the final coating shall be reported, the material information in the plating solution before the coating is formed cannot be declared.

- b) 若需申报的物质属于法规规定的豁免物质，也需如实申报物质含量，并注明该物质所符合的具体豁免条款。不得填写“其他应用（潜在禁止）”或其它形式模糊不清的豁免说明，尤其不得选择已过豁免期限的豁免条款进行豁免说明。

If the substance to be declared belongs to the exempted substance regulated by laws and regulations, the content of the substance should be truthfully declared, and the specific exemption clauses that the substance conforms to should be indicated. Do not fill in "other applications (potential prohibition)" or other forms of ambiguous exemption instructions, especially do not choose the exemption terms that have passed the exemption period for exemption instructions.

- c) 本标准表 1 中的禁/限用物质，不得以“保密物质”、“添加剂”、“其他”等方式隐瞒不报。 Prohibited/restricted substances in Table 1 of this standard shall not be concealed or reported by means of "confidential substances", "additives", "others", etc.

- d) GADSL 中分类为“D”的物质在产品中含量如超过 GADSL 中物质的报告限值（Reporting threshold），也需如实申报。

If the content of the substance classified as "D" in GADSL in the product exceeds the reporting limit (Reporting threshold) of the substance in GADSL, it should also be truthfully declared.

## 7 禁/限用物质检测要求 Detection requirements of prohibited/restricted substances

### 7.1 试验室的选择要求 Selection requirements of laboratory

本标准规定的禁/限用物质涉及检测需求时：铅、汞、镉、六价铬、多溴联苯、多溴二苯醚、石棉需选择获得长城汽车认可的试验室进行检测，其它物质建议选择获得ISO/IEC 17025认证的试验室进行检测。

When the prohibited/restricted substances stipulated in this standard involve detection requirements: lead, mercury, cadmium, hexavalent chromium, polybrominated diphenyls, polybrominated diphenyl ether and asbestos should be tested in the laboratory approved by Great Wall Motor, for other substances, it is suggested to choose the laboratories that have obtained ISO/IEC 17025 "general requirements for testing and calibration laboratory capabilities" for testing.

## 7.2 检测方法要求 Requirements of detection methods

本标准规定的禁/限用物质应尽量采用国家或国际性的检测标准进行检测；或者是采用试验室自行开发的已获得国家或国际性认证的检测方法。

The prohibited/restricted substances stipulated in this standard should be tested by national or international testing standards as far as possible; or the testing methods developed by the laboratory itself that have obtained national or international certification.

下表中列举了目前行业内普遍采用的部分物质的检测标准，供选择使用。涉及海外市场的产品，尽量采用国际标准进行检测。不涉及海外市场的产品，使用中国或国际标准进行检测均可。

The following table lists the detection standards of some substances commonly used in the industry for selection and use. Products involving overseas markets should be tested according to international standards as far as possible. Products that do not involve overseas markets can be tested by using Chinese or international standards.
